Art, Quality, Sustainability.

Inspired by all bodies of water and a love of art, Slowtide is a collaboration of three friends who wanted to convey their lifestyle through unique products. We are incessantly inspired by the world around us. From surfing, to camping, to yoga, and more, we wanted to create a premium product that fit every activity and looked good doing it. Blending design and functionality, Slowtide collaborates with brands, artists, and photographers to bring beautiful, unique designs, all while maintaining premium, sustainable quality. Slowtide is committed to creating superlative products that are guaranteed to last.

Every garment we make impacts our environment, and we take responsibility for doing everything we can to minimize, control, and reduce those impacts. We work tirelessly to design and manufacture the highest quality towels and blankets. We've built decade-long relationships to ensure we work with the best in their field. A transparent and responsible manufacturing process is important to the foundation of our brand.

Responsibility

Our Promises & Practices

OEKO TEX
CERTIFIED

All of our products exceed the Oeko-Tex Standard 100™ certification. Oeko-Tex® is a worldwide association of independent institutes for product safety and sustainable production in the textile industry. Products certified with Oeko-Tex® do not contain any toxic or allergic substances and the fabric has been tested and certified to be free from harmful levels of more than 100 substances known to be harmful to human health.

GIVING
BACK

Slowtide understands the importance of working together to create a better world. We believe that it is our responsibility to give back wherever we can. That is why we seek organizations that share our values and support them through our initiatives. Slowtide is determined to facilitate change through community outreach, education, and donation.

100% RECYCLED
MATERIALS

All of our polyester products (quick-dry towels, fleece blankets, and camp blankets) are made from 100% recycled post-consumer waste, primarily plastic bottles, and transforming them into premium polyester fibers. Certified through the Global Recycled Standard. The Global Recycle Standard applies to the full supply chain and addresses traceability, environmental principles, social requirements and labeling.

SUSTAINABLY
SOURCED COTTON

All of our cotton is certifiably sourced through the Cotton LEADS program™. The Cotton LEADS program™ is a leader in sustainable cotton production and is founded on core principles that are consistent with sustainability, the use of best practices and traceability in the supply chain. The program offers manufacturers, brands and retailers a reliable cotton supply chain solution and confidence that their raw material is responsibly produced and identified. The Cotton LEADS™ program strives to make sure cotton is produced responsibly now and for years to come.
